DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/21/09 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9,12-15,20-25 recites the limitation "the x-dimension" in the independent claims. There is insufficient antecedent basis for this limitation in the claim. It is unclear if the applicant is referring to "x_t" or "x_l".

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 12-15, 20, 21 and 25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make

and/or use the invention. Claim 12 states "'x_t' being greater than a corresponding x-dimension 'x_i' of the central shaft," while later in same paragraph of claim 12, the following statement is made: "the x-dimension 'x_t' is at least substantially equal to the corresponding x-dimension 'x_i' of the central shaft". Claim 13 has similar language. This is unclear to the examiner.

Response to Arguments

The applicant argued on 7/21/09 that the current amendments overcome the previous rejection, however there is insufficient antecedent basis for the language of "the x-dimension" limitation in the claim. It is unclear if the applicant is referring to "x_t" or "x_i".
